In 2002, we launched a company with manufacturing and supply poly-woven dunnage bags in Izmir Turkey.

In order to meet the growing demand in European markets, we opened our new production facility in Portugal and European Headquarters in Hungary, following our second plant in Amasya Turkey.

ABP airbag production Headquarters is based in Budapest Hungary and has a wide distribution sales network throughout Europe and

Russia. Our Caribbean and Latin American Sales Office is located in Barcelos Portugal.

Our manufacturing operation employs over 100 people. We have over 10 years of experience in extrusion and confection of polypropylene and polyethylene products.

ABP airbag produces custom designed multi-layer Polyethylene films whose thickness ranges between 80 microns and 200 microns for dunnage bag with the capacity of 10 000 tons per year.

ABP airbags PE blown film extrusion line is integrated to dunnage bag production. This means, ABP airbag sells the best product for a competitive price.

Our dunnage bags incorporate the latest technology and features to help you secure your loads easily and effectively.

We also manufacture dunnage airbag inflators, spare parts of inflators, and airbag valves. In addition, we also provide inflation solutions for all your dunnage bag needs.

Our production continues
in 10 000 m² area.

ABP

ABP Airbags has always viewed continuous improvement of company processes and complete customer satisfaction as essential factors for standing out in the competitive dunnage bags market. ABP Airbags has always aimed to become a preferred supplier in the industry.

ABP Airbags, with an experienced, competent and dynamic team, has wide range of equipment and test methods to fulfill your dunnage bag needs.

- Professional Manufacturing Process
- Environment and Occupational Health & Safety Applications
- Tensile Strength
- Tear Resistance
- Seal Strength
- Sensitive Digital Thickness and Weight Measurement
- Optical Density

We have been producing all equipments for dunnage airbags for over 12 years. We are a global supplier. We can provide every type of dunnage bag inflators, airguns and adapters to the dunnage airbag industry.

As an industry leader, we are dedicated to creating the highest quality products and the best innovations for dunnage bags.

We manufacture dunnage airbag inflators, spare parts, products, and provide solutions for all your dunnage airbag needs. With manufacturing facilities in Turkey, as well as worldwide; we aspire to provide the following:

- Quality products and services
- On-time delivery
- Communication
- Quality improvement

The Battery tool BT01 is the ultimate portable inflation tool in the industry.

- Cordless blower
- Charge time: ca. 4 Hours
- Power: Li-ion, 1*3000mAh
- Maximum air volume: 2.6 m³ / min
- 2 pc 5A , 18 Volt battery battery & 1 pc charger.
- High speed air flow
- Low pressure below 1 psi.

Air Bag Production

———— **ABP** ————

One of the most important factors in the development of the global world is international trade.

It is important to produce and deliver high quality products to their destinations. Historically, in the Middle Ages, shipments of goods were made by caravans between some countries (see Silk Road). Since the existence of trade, the transportation of goods plays an important role. Today, global trade is unthinkable without transportation.

Air Bag Production
ABP

Safe shipping starts with safe loading.

Any logistic activities whether it is at sea, road or rail involves a certain degree of risk. In general, it is difficult to estimate the damage caused by human or natural factors.

Air Bag Production
ABP

Possible damages of a few 10 thousand dollars can be avoided with simple method that requires a low investment.

On average, a truck carries goods which worth approximately \$ 50,000. With the help of Dunnage bags, which only require an investment of about \$ 50-80, We can consider our cargo completely safe.

Air Bag Production
ABP

Many people believe that insurance will cover any kind of damage which may occur during the transportation.

We all know that insurance companies are not always willing to pay or even if they pay, unfortunately it can take several months before you receive the money. Such an issues can be harmful for the both sides. Simple dunnage bag can be effective solution for your goods and by using dunnage bags you will be able to avoid the risk of complaints, claims and loss of trust. In the long run, it is easy and effective solution for your business.

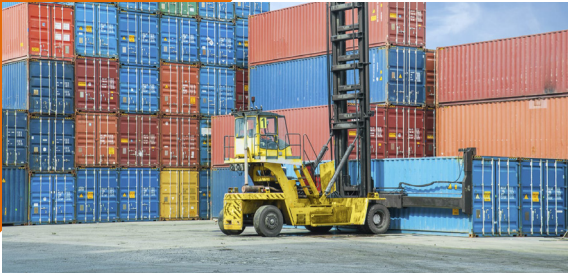

Air Bag Production
ABP

ABP dunnage bags can guarantee the safety and integrity of your products in unforeseen scenarios such as as truck accident.

Dunnage bags can be used for all types of transport vehicles and cargo. Including pallets, paper containers, drums, boxes, machinery, household appliances, electronic devices, application products, fresh fruit or canned goods.

Air Bag Production
ABP

Filling the gaps between the goods (trucks, trains and containers) with alternative methods is not an effective solution.

ABP dunnage bags effectively fill and balance the spaces between the stacks. Their high-pressure capacity enables them to withstand the forces and pressures generated during transportation.

Figure 4

Dunnage bag usage instruction

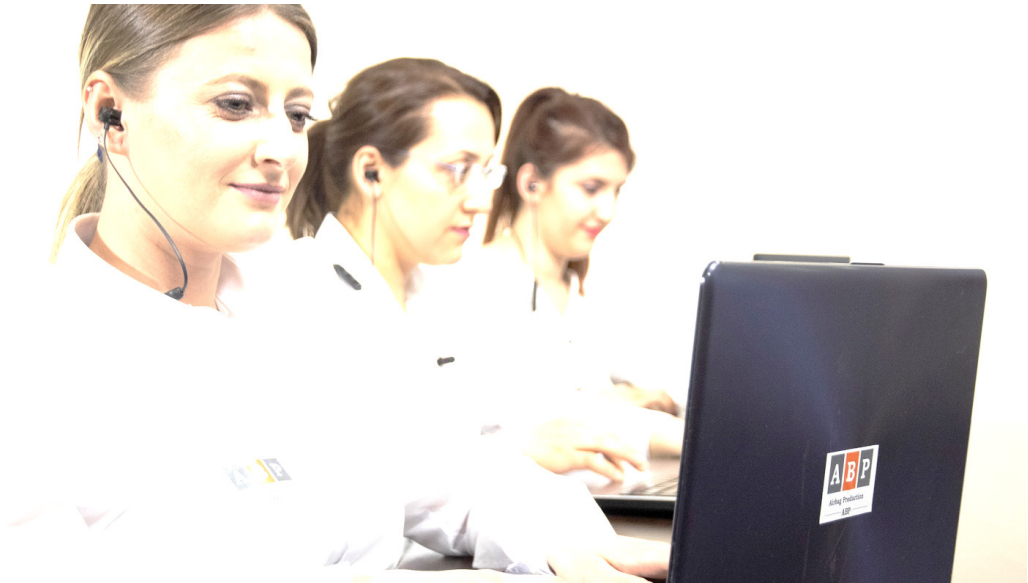

1. Place the dunnage bag between 2 pallets, boxes or other objects.
2. Connect the inflator to the valve of the airbag (Figure 2).
3. Inflate the airbag while pressing the inflator's button (Figure 3).
4. When the air bag has reached the proper hardness, detach the gun from the valve on the dunnage bag (Figure 4).
